

Making Surgery Smarter and Safer

Caresyntax is on a mission to make surgery smarter and safer—empowering surgeons and leaders at Hospitals & Surgery Centers to improve patient outcomes, enhance operational efficiency, and increase profitability with data-driven surgery using AI, automation, and analytics. Data-driven surgery reduces unnecessary variation and allows the care teams to focus on the patients and case variation. Data from Electronic Health Records, Medical Devices, Imaging and Video across the entire perioperative continuum is leveraged to provide Decision Support and Workflow Assistance. With turnkey implementation, the Caresyntax platform is used in more than 3,000 operating rooms worldwide and supports surgical teams in over 3 million procedures per year.

ProAssurance supports Caresyntax with an alliance to reduce cost and improve outcomes.
